

School of Computer Science and Engineering

Winter Semester 2023-24

Continuous Assessment Test - 1

SLOT: C1+TC1

Programme Name &Branch: M.Tech (Integrated) Data Science

Course Name & code: Machine Learning for Data Science (MDI4001)

Class Number: 2477, 2478

Faculty Name : Dr. Anisha M. Lal, Dr. Jyotismita Chaki

Exam Duration: 90 Mins Maximum Marks: 50

Q. No:	Question							,		Max. Marks
1/	Discuss about how to handle the challenges in machine learning listed below, a) Poor Quality Data b) Irrelevant Features c) Overfitting the Training Data d) Underfitting the Training Data							10		
2/	a) Discuss the methods used for feature scaling with proper example. (6) b) Discuss the need of regularization along with a suitable example. (4)							10		
3.	The following data relate to advertisement expenditure (in lakh of rupees) and their corresponding sales (in lakh of rupees).						10			
	Advertisement expenditure	40	50	38	60	65	50	35		
	Sales	36	60	55	50	60	48	30		
	Perform the following, a) Estimate the parameter values using linear regression (5) b) Draw the graph and represent the linear regression line fit (3) c) Estimate the sales corresponding to advertising expenditure of Rs. 30 lakhs. (2)									
4.,	Explicate the types of gradient descent algorithms (along with suitable examples) which minimizes the cost function in machine learning.							10		

Figure 1: Plot is generated on non-linear data using linear

10

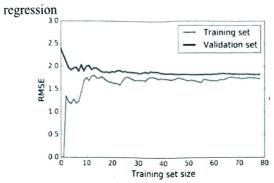

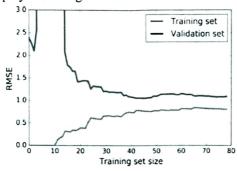

Figure 2: Plot is generated on non-linear data using 10-degree polynomial regression

b) Calculate the precision and recall for the given confusion matrix and plot the ROC curve. (6)

Predicted

		Greybound	Mastiff	Samoyed
.	Greybound	240	15	18
200	Mastiff	21	310	14
5	Samoyed	22	10	170
